**Training and assessment arrangements – assessment techniques**

**Assessment System – Competency Based**

Competency based assessment is used during all assessment activities. Competency is proved by demonstration of knowledge and practical application of skills. Time lines are taken into consideration for practical skills and candidates must meet the criteria as deemed industry competent by the assessor.

The ‘assessment activities’ including instrument tools will include, but are not limited to, such things as written/ oral questions, third party feedback, activities, and projects, case studies of knowledge and practical application of skills which meet candidate styles in a training and assessment environment.

ACMUSE uses combination assessment methods and approaches that will involve collecting a range of evidence for ensuring consistency of competency.

The methods of assessment will allow for the process to meet the training package requirements, the principles of assessment and be valid, reliable, flexible and fair.

All evidence that is collected must be valid, sufficient, authentic and current. These requirements have been addressed in the design of the assessment tools that will be provided to candidates.

Assessment of the units of competency in CUA51015 Diploma of Screen and Media (Specialist Make-up Services) can be undertaken in a simulated workplace environment although workplace assessments may also be undertaken.

Where there is any uncertainty that the above criteria have not been met, the assessor should liaise with another assessor or supervisor within ACMUSE to make a determination.

**Dimensions of Competency:** The four dimensions of competency; task skills, task management skills, contingency management skills and job/ role environment skills are addressed by written and practical assessment.

Trainers/ Assessors ensure the candidates are taken through a series of activities of varying difficulty during delivery.

**Assessment techniques or tools used to gather evidence**

The following matrix identifies the type of evidence that will be collected towards competency and to enable judgments to be made about students’ competency in each unit. Assessors have flexibility (according to the requirements of the Training Package, including the Assessment Guidelines and units of competency) to accept other forms of evidence from individual students (eg., through RPL).
